

# PETER CHRISTENSEN HEALTH CLINIC

## FOR IMMEDIATE RELEASE

The computer and phone systems of the Peter Christensen Health Center have been impacted by a possible cybersecurity incident. The matter is currently being investigated, and may be related to a recent cyberattack on another area health system.

At this time, as a cautionary measure, PCHC is not connected to the internet. As a result, PCHC is unable to receive incoming phone calls on its internal phone system, but patients may reach staff members at the following designated cell numbers:

**715-892-5836 or 715-892-1371**

PCHC is doing everything possible to continue to provide routine patient care, but access to patient information is limited at this time. Accordingly, patients seeking care should bring their medications with them, or a list of medications, as well as information regarding allergies.

Any medications ordered from the PCHC Pharmacy prior to Monday, May 13, 2024 are available for pick-up at the pharmacy.

PCHC is presently unable to respond to urgent medical needs. Patients in need of urgent health care should contact Marshfield Hospital or Howard Young Medical Center in Minocqua, Wisconsin. **In the event of a medical emergency, please call 911.**

The Family Resource Center has also been affected by this incident, but will continue to see clients who have scheduled appointments. The FRC can be reached at:

**715-661-0411**

Further information will be provided as the investigation of this incident continues.
